

Summer Math Requirement

Students entering grades 5 and 6

Studies have shown that students can lose up to two months of learning over the summer months. In order to keep your child's skills sharp, he or she will be required to complete a skill plan found within the IXL platform, the Summer Boost Skill Plan. This skill plan highlights foundational skills from the previous year and is designed to help students get on track in order to succeed at the next grade level. The Summer Boost Skill Plan has been added to your child's IXL account. This can be found by selecting "Skill Plans" which is found under the Learning tab upon logging into your student's IXL account. The Summer Boost program is organized to be completed over a 20 day period and a 4 week span. Of course this can be tailored to fit your family's schedule. Each day's lesson should be completed to a smart score of 90, even if the lesson has been completed in the past. Half credit will be given for lesson smart scores that range between 80-89. Lessons with smart scores that fall below a smart score of 80 will not receive credit. If a student struggles with a math concept, each IXL lesson contains video help that is available on the lesson page. Students are encouraged to watch these videos in order to best understand the skill.

All lessons must be completed by Friday, August 7, 2026.

If at any time you would like to view your student's progress, simply navigate to the "analytics" tab and select your child's "student summary report". From here you can view the student's overall progress.

Please feel free to contact me through June 19, 2026 with any questions.

cdipofi@ccacornerstone.org. After June 19, please contact the school office with any additional questions.

Thank you and enjoy your summer break!
